Cambridge Tiled 3D Models

Building Models in OBJ format

Sources:

Building Models: Stereo Photogrammetric observations interpreted to three dimensional models by CyberCity3d. Last updated with 2023 data.

Tile Scheme and Coordinate System:

The 5000 foot tile scheme is designed to facilitate exchange of precise georeferenced models and context information among a variety of authoring and presentation tools. The tile network covers the greater Boston area.

State Plane coordinates are offset to keep all coordinates within limits inherent in most 3D design tools.

Projected Coordinate System:
State Plane Massachusetts Mainland (Feet), North American Datum of 1983.

Vertical Datum:
North American Vertical Datum, 1988 (NAVD 88) Feet (Height)

Coordinate System Origin (Offsets)

- X: 731,100 MA State Plane Feet
- Y: 2,902,900 MA State Plane Feet
- WGS84 Longitude: 71.223391 W
- WGS84 Latitude: 42.213379 N
- Elevation: 0
- Rotation to align with True North: Clockwise 0.34 Degrees.
